

MEDICATION REVIEW & RECONCILIATION

CPT: 90863, 99605, 99606

CPT-II: 1160F, 1159F

HCPCS: G8427

Patient Name: _____

DOB: _____ Date: _____

Instructions: A Prescribing Practitioner or clinical pharmacist should conduct a medication review at every patient visit. *Only for recently discharged patients, an RN may also conduct the medication review.*

1. Was the patient discharged from the hospital within the past 31 days?
 If Yes, mark this box: CPT: 1111F (Note: RN may continue to Step 2)
 If No, only a Prescribing Practitioner or clinical pharmacist can continue to Step 2.
2. Review all prescription and OTC medications currently in use.
3. Sign and date the bottom.
4. Give a copy to the patient.
5. Keep a copy in the patient's chart.

MEDICATION REVIEW & RECONCILIATION TABLE

#	Discharged Medication Name (only if answered Yes to #1)	Current Medication Name (Include strength, dosage, directions, quantity, etc...)	What is this for? (e.g., diabetes, blood pressure, cholesterol)	Notes (e.g., Start/Stop on mm/dd/yyyy; Directions changed to...)
